Profile

Senior-2 Computer Engineering student at Cairo University with a track record of delivering, not just learning – leading a 5-person team to build a Flutter-based social app, strengthening FinTech backends, and driving QA automation. I bring both technical range and ownership to every project I touch. Seeking an internship where that combination makes an immediate impact.

PROFESSIONAL EXPERIENCE

- 07/2026 – 09/2026 📌 **Vodafone Egypt, QA & Automation Testing Internship.**
- 08/2025 – 09/2025 📌 **SuperPay by e& Egypt, FinTech Software Developer Internship.**
- 08/2024 – 09/2024 📌 **e& Egypt, Full Stack Developer Internship using MEAN Stack.**
- 08/2022 – 09/2022 📌 **Kanawat for Trading & Distribution IT Service Specialist Internship**

Education

- 2022 – 2027 📌 **Bachelor of Engineering** in Computer Engineering.
At Cairo University Faculty of Engineering Credit Hours System (CHS).
Cumulative GPA: 3.01
Last Semester GPA: 3.15

Previous Projects

Web Development Projects

- 1 *Superpay acquirer bank system*, <https://github.com/SuperPay-Internship-2025/AcquirerBank>, Engineered a secure backend Acquirer Bank system for the SuperPay payment ecosystem using Java 17, Spring Boot, and PostgreSQL. Implemented Domain-Driven Design (DDD) to create RESTful APIs for processing financial transactions and managing customer/card lifecycles. Integrated advanced JOSE Hybrid Encryption (JWE/JWS) and RSA Key-based authentication to ensure end-to-end data security., 2025.
- 2 *Microservice api gateway*, <https://github.com/Akhamdyy/Microservice-API-Gateway>, Designed Created Fully Functioning API Gateway for Microservices (BACKEND ONLY) using JavaScript, Express.js, Node.js and MongoDB that can be Widly Implemented for All Types of Microservices with User Authentication and a Product Catalog., 2024.

Applications Projects

- 1 *Harmonica music & social streaming app*, <https://github.com/Team-6-CUFE/Cross>, Led the 5-person cross-platform sub-team (within a 20-person team spanning frontend, backend, testing, and DevOps) in building Harmonica, a SoundCloud-inspired music streaming and social app, using Flutter with Clean Architecture (BLoC/Cubit, GetIt/Injectable DI). Implemented real-time messaging and notifications via Socket.IO and Firebase Cloud Messaging, OAuth login (Google & Facebook), and Stripe-based premium subscriptions., 2026.
- 2 *PressurePal smart health tracker*, <https://github.com/Akhamdyy/PressurePal>, Developed a cross-platform healthcare mobile application using Flutter, Dart, and Supabase. Integrated Google Gemini Flash for context-aware health insights, Google ML Kit for automated camera OCR logging, and natural language voice recognition. Designed with accessibility in mind, featuring automated background SMS emergency alerts and biometric security., 2026.

- 3 *Collaborative text editor*, <https://github.com/Akhamdy/Collaborative-Text-Editor>, Led a Team of 4 in the development of a real-time collaborative text editor with Java, Spring Boot, JavaFX, and WebSocket. Included live cursors and conflict resolution (CRDT), Comments, Importing Exporting Service and a LAN Server Discovery Service., 2025.
- 4 *Os process scheduler & memory management simulator*, <https://github.com/Akhamdy/OS-Process-Schedular>, Designed and implemented a comprehensive Operating System simulator featuring CPU scheduling algorithms (SRTN, RR, HPF) and a Memory Management Unit (MMU). Integrated a complete paging system with demand paging, Second Chance (Clock) page replacement, and disk I/O latency simulation for page faults., 2025.

Skills

Languages	Fluent reading, writing and speaking competencies for English, Arabic, Basic Knowledge of French.
Coding	Java, C++, C, Python, Dart, MATLAB, ...
Databases	MySQL, PostgreSQL, MongoDB, H2 DB, Supabase.
Web & FinTech	Spring Boot, Hibernate/JPA, Node.js, Express.js, Angular, React, REST APIs, JSON Web Token, OAuth 2.0, Cryptography (JWE/JWS, RSA), 3D Secure, Stripe.
Mobile & AI	Flutter, BLoC/Cubit, GetIt/Injectable DI, Firebase Cloud Messaging, Socket.IO, Google Gemini API, Machine Learning (OCR), Speech-to-Text, Biometric Security.
Systems	Operating Systems (Scheduling/MMU), System Simulation, 8086 Assembly, Intel ARM, Microprocessor Systems, TCP/UDP, WebSockets.
Tools & Tech	Git BASH, Git Hub, VS Code, PostMan API, Dev Ops, SOLID Principles, Domain-Driven Design (DDD), Clean Architecture, Repository Pattern, OOP.
QA & Automation Testing	Selenium WebDriver, Cucumber (BDD/Gherkin), TestNG, Page Object Model (POM), Allure Reports, Maven, WebDriverManager.
